INTRODUCING THE S.F.E. GROUP

The **Specialized Fabrication Equipment Group** (in short: **S.F.E. Group**) was founded in 2019 after the merger of three world leading OEM's in the field of pipe fabrication tooling and machinery: B&B Pipe and Industrial Tools LLC (USA), Mathey Dearman Inc. (USA) and TAG Pipe Equipment Specialists (UK). In a time span of 5 years, another 4 renowned and market leading companies were acquired and added to the **S.F.E. Group** portfolio: Axxair (France, 2022), Magnatech (USA, 2023), Climax (USA, 2023) and SUMNER (USA, 2025).

The vision and philosophy of the **S.F.E. Group** is to offer globally a comprehensive innovative and cost-effective range of specialized fabrication, welding and machining equipment and derived rental solutions, for a wide range of applications within all critical industries, while optimizing performance, efficiency and safety.

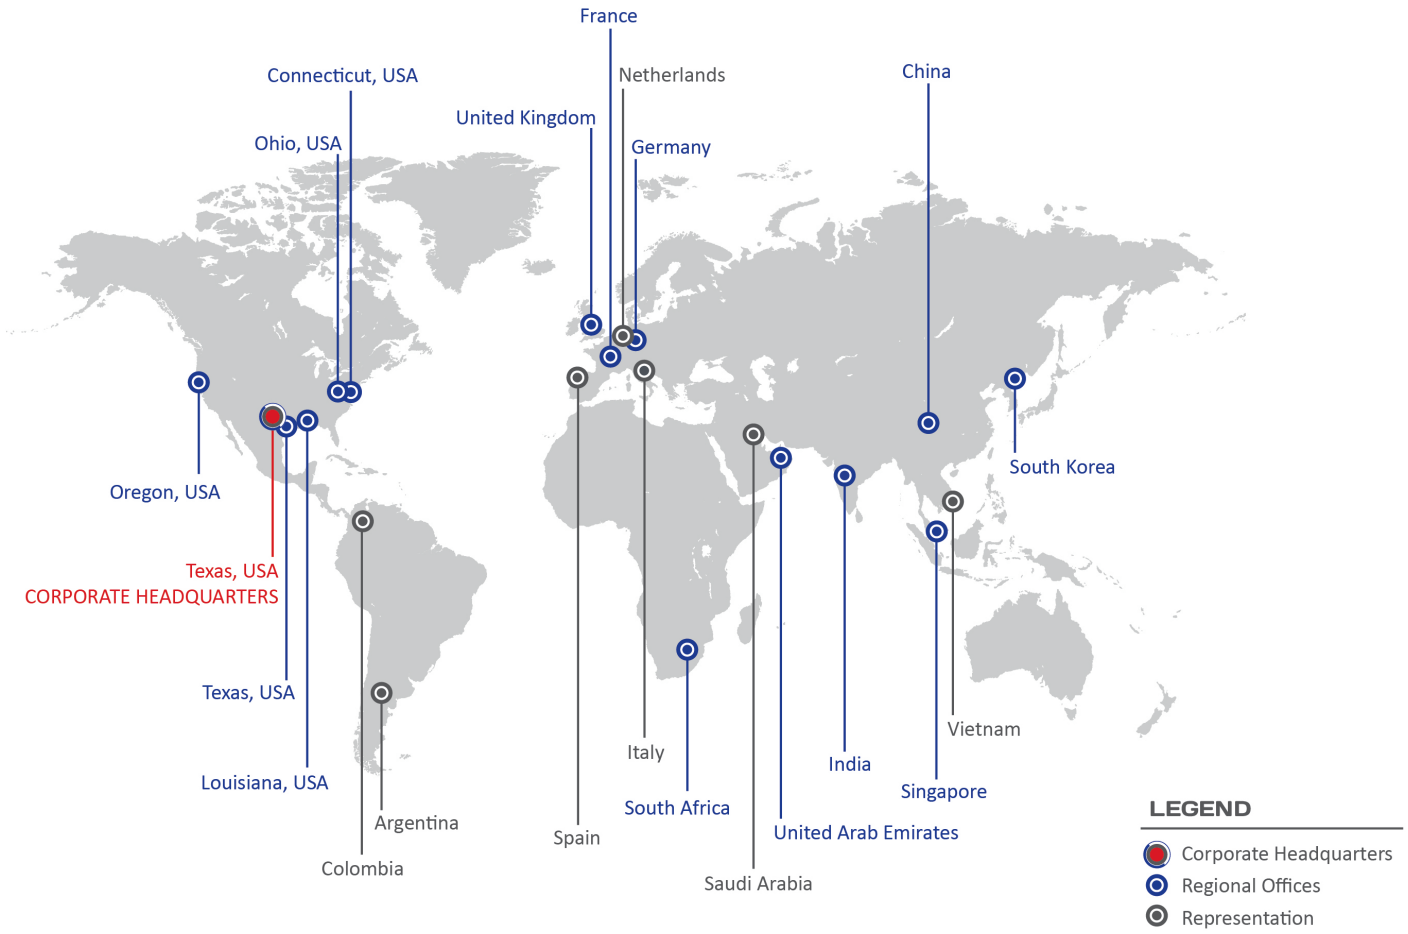

Leveraging over 200 years of combined experience in engineering, manufacturing, and field applications, the **S.F.E. Group** is committed to driving innovation. Through continuous product development and strategic acquisitions, the **S.F.E. Group** is actively growing its portfolio and expanding its global presence to meet the demands of industries around the world. Currently, the **S.F.E. Group** consists of 12 complimentary brands, each supporting the others in delivering cutting-edge solutions.

With offices and warehousing on 5 continents, 400+ employees and more than 500 partnerships and distributors worldwide, **S.F.E. Group** prides itself on consistently offering the highest standards of both product quality and service locally to all its customers.

S.F.E. Group looks forward to welcoming you into its global network as a partner, distributor or end user customer and remains at your disposal at any time.

S.F.E. GROUP GLOBAL PRESENCE

INTRODUCING SUMNER MATERIAL LIFTS

SUMNER Material Lifts is a world leading brand in the material handling and construction industries, renowned for its innovative, durable, and user-friendly solutions. Founded in 1965 and now a part of the Specialized Fabrication Equipment Group (in short S.F.E. Group), **SUMNER Material Lifts** has built a global reputation for providing high-quality lifting equipment. Designed with safety and efficiency in mind, **SUMNER Material Lifts** products are widely used by professionals in mechanical contracting, plumbing, HVAC, welding, and electrical installation.

SUMNER Material Lifts' product line includes a broad range of lifting tools such as material lifts, duct lifts, Roust-A-Bouts, gantries, and heavy-duty hoists, all engineered to meet the demanding requirements of job sites around the world. All equipment is known for ease of use, robust construction, and industry-leading safety features, making it the preferred choice for both large-scale industrial projects and everyday construction needs.

With a long tradition of quality, reliability and value and a strong commitment to innovation and customer satisfaction, **SUMNER Material Lifts** continues to set the standard in lifting and material handling solutions.

In conjunction with all other S.F.E. Group portfolio's brands, **SUMNER Material Lifts** continues to lead the way in lifting and fabrication solutions, delivering tools that elevate the operator's standard of work.

SUMNER Material Lifts products are always nearby available within the S.F.E. Group global network and can be consulted on the dedicated website: www.SUMNER.com

SAFETY FIRST

Safety is essential in the use and maintenance of Sumner Equipment. This instruction manual and any markings on the tool provide information for avoiding hazards and unsafe practices related to the use of this tool. Observe all the safety information provided.

SAFETY ALERT SYMBOLS

These symbols are used to call attention to hazards or unsafe practices related that could result in injury or property damage. The three safety words defined below indicate the severity of the hazard. The message after the signal word provides information for preventing or avoiding the hazard.

DANGER - Immediate hazards that if not avoided **WILL** result in severe injury or death

WARNING - Hazards that if not avoided **COULD** result in severe injury or death

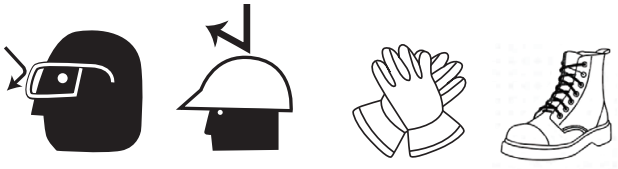

CAUTION - Hazards or unsafe practices that, if not avoided **MAY** result in severe injury or death

⚠ WARNING

- Read and understand all instructions and safety information in this manual before operating or servicing this tool.

FAILURE TO OBSERVE THESE WARNINGS COULD RESULT IN SEVERE INJURY OR DEATH

⚠ WARNING - Personal Safety Hazards

- Only qualified persons should use the Sumner Premium Series Lever Hoist.
- Wear eye protection, hard hat, cut resistant gloves and safety toe shoes when using this tool.
- Do not use tool while tired or under the influence of drugs, alcohol, or medication.
- Keep body parts and loose clothing away from moving parts.
- Always follow operating procedures.

FAILURE TO OBSERVE THESE WARNINGS COULD RESULT IN SEVERE INJURY OR DEATH.

⚠ DANGER: Electrical Shock Hazards

- This is not an insulated tool, contact with live circuits could result in severe injury or death.

FAILURE TO OBSERVE THESE WARNINGS CAN RESULT IN SEVERE INJURY OR DEATH

IMPORTANT SAFETY INFORMATION

⚠ WARNING: Entanglement Hazard

- Do not operate this tool while wearing loose fitting clothing. Retain long hair.

FAILURE TO OBSERVE THESE WARNINGS CAN RESULT IN SEVERE INJURY OR DEATH

⚠ WARNING: Tool Use Hazards

- Use this tool for the manufacturers intended purpose only. Use other than that described in this manual can result in injury or property damage.
- Only qualified personnel should configure and use the Sumner Lever Hoist.
- This lever hoist is designed and intended for use by properly trained and experienced personnel only. If you are not familiar with the proper and safe operation of a lever hoist, do not use until proper training and knowledge have been obtained.
- Do not use lever hoist to lift, support or transport people; or to lift or support loads over people.
- Do not exceed the rated capacity of the hoist.
- Do not attempt to extend the lever handle using a “cheater pipe” or any other such device.
- Do not strike the lever handle with a hammer or any other object.
- Do not use the chain as a sling. This may cause damage to the chain.
- Always inspect the lever hoist for damage prior to use. If hoist is damaged, do not use until it has been repaired or replaced.
- Do not use more than one lever hoist to lift or move a load. If this is unavoidable, each hoist must have the same capacity as the load to be moved.
- Never allow chain to “set” over sharp edges. All pulls or lifts must be made with straight chain that is free of obstacles.

IMPORTANT SAFETY INFORMATION

- If the lever handle is difficult to operate, then the load exceeds the capacity of the hoist. Reduce load or select a hoist of larger capacity.
- Do not use hoist if the chain is twisted, kinked or damaged.
- Do not operate hoist unless load is centered between top and bottom hooks.
- On hoists with the overload warning lever, do not use this device to measure load weight.
- Always take time to study the job to be performed and choose the safest method. Do not place yourself or other people in an unsafe position.
- Always maintain your balance and firm footing when operating the lever hoist.
- Leave all internal maintenance and inspections to a qualified Sumner Service Center.
- Do not attempt to lengthen or repair load chain. Replace chain with factory replacement chain only. Do not use any other type of chain.
- If welding near the hoist, do not allow the chain or hook to be touched by a live electrode. Prevent weld splatter upon the chain.
- Never use the hoist if either hook is stretched, deformed, or has a broken or missing safety latch. Always replace the safety latch and/or the hook before placing the hoist back in service.
- Be sure supporting structures and load-attaching devices used in conjunction with this lever hoist provide an adequate safety factor to handle the rated load plus the weight of the equipment. If in doubt, consult a qualified structural engineer.
- Keep visitors a safe distance from the work area. Keep children away.
- Understand and follow all procedures as set forth in American National Standards titled “Performance Standard for Manually Lever Operated Chain Hoists,” ANSI/ASME HST-3; and “Manually Lever Operated Hoists,” ANSI/ASME B30.21. These standards are available through the American Society of Mechanical Engineers at www.asme.org.

FAILURE TO OBSERVE THESE WARNINGS CAN RESULT IN SEVERE INJURY OR DEATH

⚠ CAUTION

- Do not use if any parts are damaged as this can cause an unsafe condition and lead to tool malfunction or failure.
- If tool is in disrepair, **DO NOT USE**. Have tool inspected and repaired or replaced prior to use.

FAILURE TO OBSERVE THESE CAUTIONS CAN RESULT IN INJURY OR PROPERTY DAMAGE

⚠ WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to http://www.p65warnings.ca. gov.

Purpose of this Manual

This manual is intended to familiarize all personnel with the safe installation and operation of the following: PREMIUM LEVER OPERATED CHAIN HOIST
Keep this manual available to all personnel. Replacement manuals are available upon request at no charge at www.sumner.com.

Description of Operation

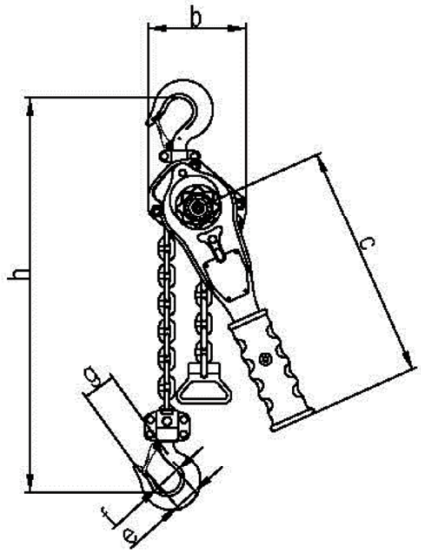

This manual is provided by Sumner covering the safe operation and maintenance procedures for the Sumner Premium PLH Series Lever Hoists/Pullers. This manual contains instructions on installation, safety precautions, general operating procedures, maintenance instructions and parts breakdown. This tool has been designed and constructed to provide consistent, long-term operation if used in accordance with instructions set forth in this manual.
The PLH Series hoists are all steel construction with a powder coat finish and have a completely enclosed Weston-type automatic brake system.

The PLH series hoists are proof-tested and comply with OSHA, ANSI/ASME B30.21 and HST-3 standards.

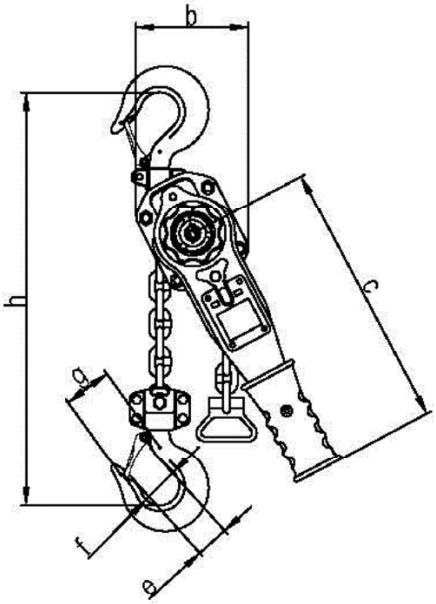

Description of Operation

If there are any questions or comments, please contact either your local supplier or Sumner Manufacturing. Sumner can also be reached at our web site: www.sumner.com.
The specifications in this manual were current at time of publication, but because of our policy of continuous improvement, Sumner reserves the right to change specifications at any time and without prior notice, without incurring obligations.

SUMNER MATERIAL LIFTS IDENTIFICATION

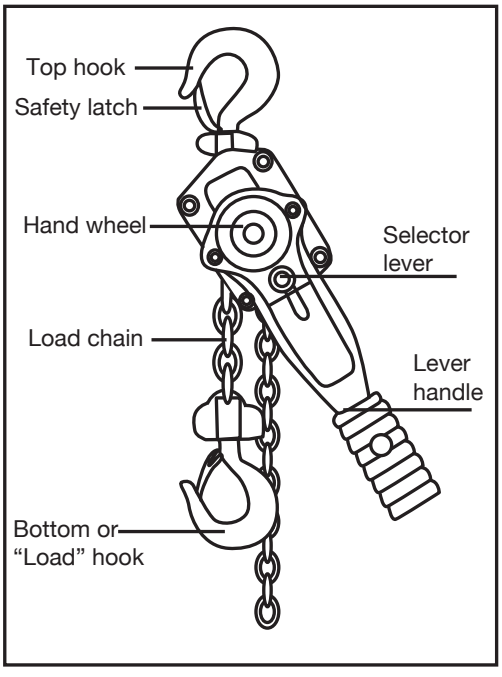

FIG 1

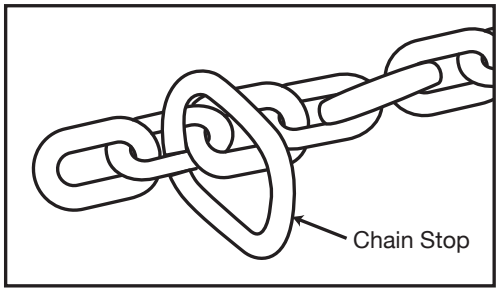

FIG 2

INSTALLATION

Support for the hoist may be hook, clevis pin, trolley, or beam clamp. Whatever method of suspension is chosen, the support components must be rated equal to, or greater than the capacity of the lever hoist. Supporting structures (such as I-Beams, etc.) should be installed by properly licensed professional installers.

INSPECTING THE LOAD CHAIN

⚠ WARNING: Do not operate the hoist with a twisted, kinked or damaged chain. Do not splice the chain.

- Check that the chain does not twist along its length from hoist to hook. If twist is present on units with multiple falls, the hook must be passed back through the chain loop to remove all twist in the chain.
- Replace the chain if links are stretched too long or seriously worn on the surface, especially at the points where links contact especially at the points where links contact each other. See “Allowable Limits” on page 14 for measuring chain elongation.
- Do not use a chain that is seriously rusted or cracked.
- Periodically apply a light coat of 30-weight oil to the chain. This will create easier operation and prolong the chain's life. For optimum results, clean the chain with an acid-free solution before oiling.
- Never extend load chain by welding a second piece to the original.

⚠ WARNING: The load chain supplied with your Sumner lever hoist is designed, manufactured, and tested for proper fit and durability. If chain should ever need replacing, for your own safety use factory replacement chain only. Use of other than factory replacement chain may cause serious injury and/or damage to the lever hoists.

INSPECTING THE HOOK

It is important to check top and bottom hooks for proper opening and other signs of deformation or damage. Replace a hook immediately if any of the following problems are identified:

- The safety latch no longer contacts the hook opening.
- The vertical angle at the neck of the hook reaches 10°, see (FIG 3).
- Chemical corrosion or cracks on the hook.
- Excessive wear on the inside surface.
- The throat opening has enlarged. See (FIG 13) for the maximum allowable limits for the throat opening.

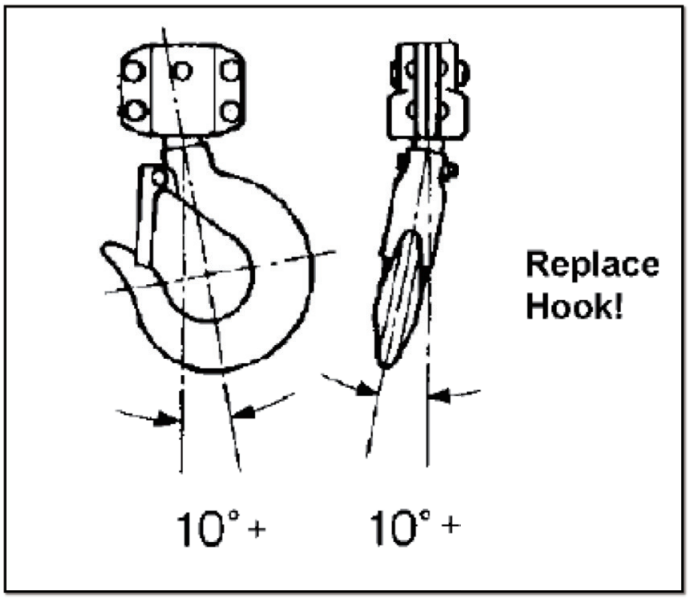

FIG 3

⚠ WARNING: Do not attempt repair of the hook by heat treating, bending or attaching anything by welding. Doing so will weaken and may cause failure of the hook.

FURTHER INSPECTIONS

- With the lever in the up position, while pulling down on the chain or with a load connected, check for a clicking sound when the handle is rotated in a clockwise direction. If these sounds are not present, or if irregular clicking noises develop, do not use the hoist – have it inspected and repaired by an authorized service center.
- With the lever in the up position, check free play in handle rotation. Free play is measured by the distance the handle travels before resistance or gearing is felt. If free play has reached 3/4 of a turn, brake discs are worn and should be replaced by a Sumner authorized service center.
- The brake mechanism must be kept clean and free from dirt, water, and oil. Never allow oil to penetrate the braking mechanism. The brake should not slip while the hoist is in use.
- If the lever hoist has not been used for an extended period, check for proper operation before putting into service.

OPERATION

The PLH Lever Hoist may be used either in vertical position as a hoist; or in angled or horizontal position as a puller. Below is the general procedure for operating the hoist:

1. Set the top hook securely.
2. Place the selector switch on the handle in the center neutral position, and pull out on the handwheel (A, FIG 4). This will allow “freewheel” mode. Pull the load chain by hand to position the bottom hook.
3. Correctly center the load on the bottom hook (FIG 5). Incorrect loading is dangerous to the operator, the lever hoist, and the load.

- Never load the hook in front of the safety latch (A, FIG 6).
- Never load the hook tip (B, FIG 6).
- Never load the hook off the centerline (C, FIG 6).
- Never load the hook sideways (D, FIG 6).

4. Rotate the hand wheel clockwise while simultaneously pulling down on the load chain, (B, FIG 4). The hand wheel will snap back into place, re-engaging the gear.
5. Move selector switch to the UP position. Ratchet the lever to raise or pull the load. Do not overload the lever hoist.

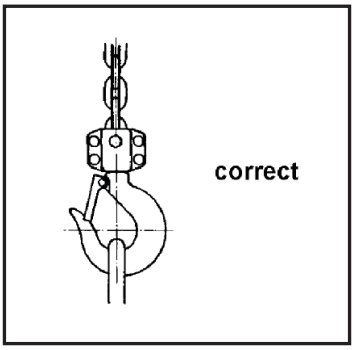

FIG 5

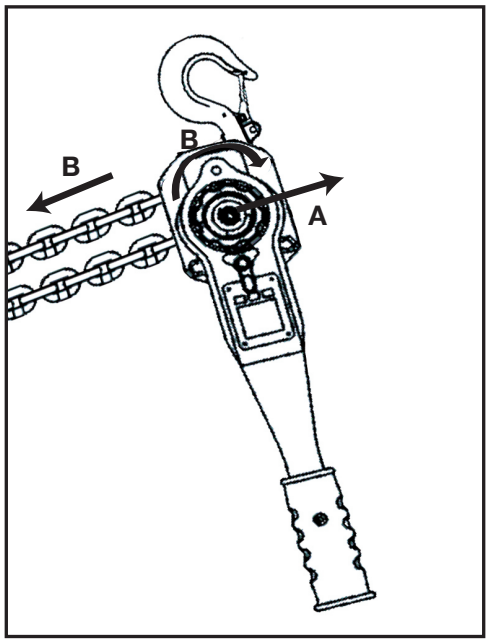

FIG 4

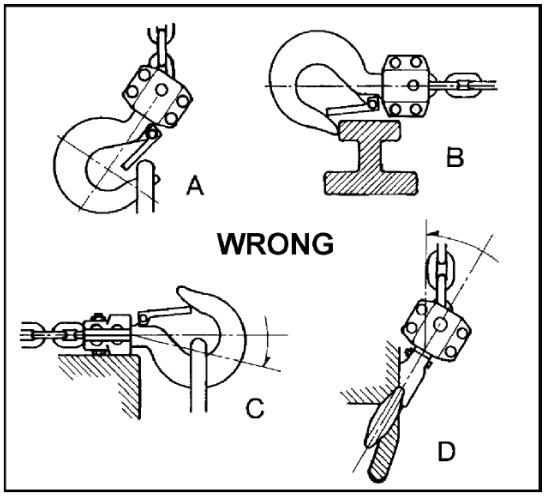

FIG 6

⚠WARNING: Do not touch the handwheel while lifting or lowering. Do not operate freewheel mode while there is a load on the hoist.

6. To release or lower the load, turn selector switch on the handle to the DOWN position and ratchet the handle.

NOTE: If the chain is pulled too suddenly in freewheel mode, the brake may set preventing further pulling. Re-set the hoist by repeating step number 4 above, and then set the hoist back into freewheel mode to continue the operation.

7. Move selector switch to the UP position. Ratchet the lever to raise or pull the load. Do not overload the lever hoist.

8. To release or lower the load, turn selector switch on the handle to the DOWN position and ratchet the handle.

⚠CAUTION: Avoid lifting one load with two hoists. If this is unavoidable, apply equal weight to both hoists and use hoists with the proper lift capacity. Capacity of each hoist must be equal to the total load to be lifted.

PRECAUTIONS

- During pulling operations, the operator should stand near the side of the top hook on the opposite side from the lever. If the hand should slip off the lever, the lever will spring back away from the operator.
- During lifting operations, do not stand under the load.
- Do not use an extension on the lever (FIG 7).
- Do not use a foot to apply pressure to the lever (FIG 8).
- When using a wire rope sling, the puller must be applied along a straight line parallel to the surface on which it is resting (FIG 9).
- When lifting loads, hook the load with slings. Do not use the lever hoist chain as a sling (FIG 10).
- Both ends of a sling or rope must be completely on the inside of the safety latch before pulling or lifting the load. Do not put one end on the inside of the latch and leave the other end on the hook end outside the latch.

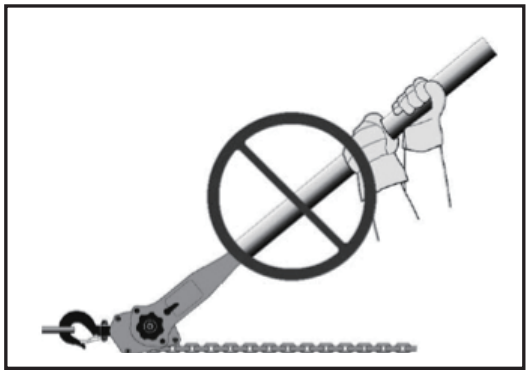

FIG 7

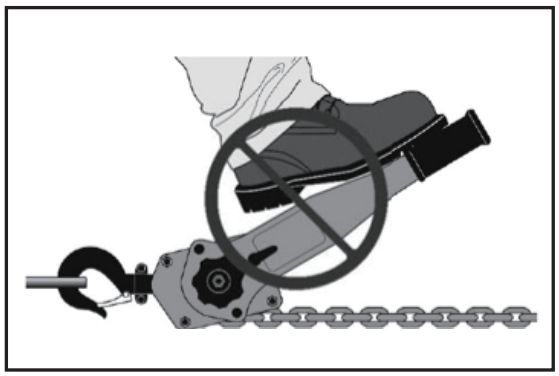

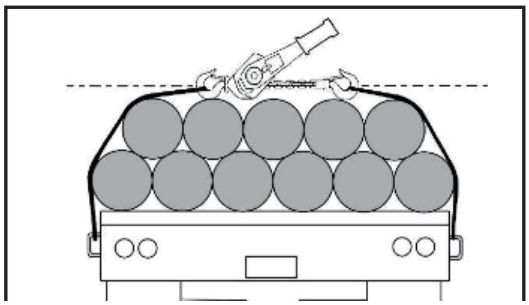

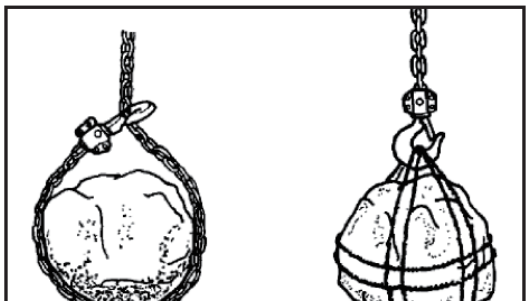

FIG 8

INSPECTION AND MAINTENANCE

Read and follow ANSI Inspection and Maintenance Instructions. Know the meaning of Frequent Inspection, Periodic Inspection, Normal Service, Heavy Service, and Severe Service. It is the customer's responsibility to understand and follow all ANSI and Sumner inspection and maintenance instructions.

The lever hoist should be stored in a clean, dry environment. Clean and oil the hoist before storage. Hoists that are installed outdoors should be covered or brought inside when not in use.

Periodically apply a light coat of 30 weight oil to the load chain. Also lubricate the safety latches and the bearings in the hooks.

Annually, the hoist should be disassembled, inspected, and cleaned by trained and experienced personnel only. Contact a Sumner authorized service center by calling your dealer or visiting our web site at www.sumner.com.

WEAR LIMITS LOAD CHAIN

- Carefully inspect the entire load chain. As illustrated in (FIG 11), measure five consecutive links with calipers to find the length, Compare the results with the table in (FIG 12). Check every three feet and especially where excessive wear is indicated. Any load chain that shows noticeable deformation or heat influence must be replaced with a new one.

⚠WARNING: WARNING: Never extend load chain by welding a second piece to the original.

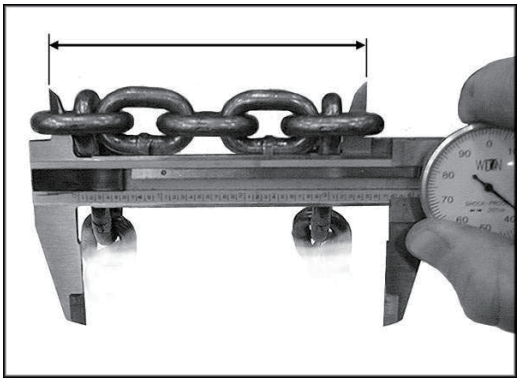

FIG 11

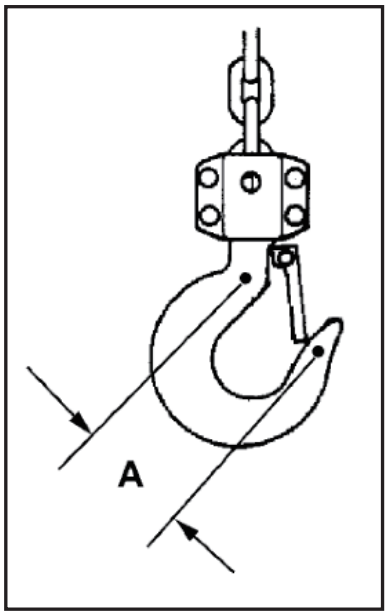

Capacity	5 Links Normal (in)	5 Links Limit (in)
0.8 ton	3.10”	3.19”
1 ton	3.10”	3.19”
1.6 ton	3.92”	4.04”
3.2 ton	5.51”	5.68”
6.3 ton	5.51”	5.68”
9 ton	5.51”	5.68”

FIG 12

HOOK WEAR LIMITS (TOP and BOTTOM)

• Replace the hook when “A” in (FIG 13) is wider than the Limit Dimensions shown in the accompanying table.

⚠WARNING: Never heat treat the hook or attach anything to the hook by welding.

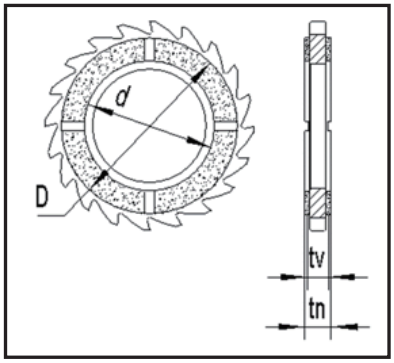

Capacity	“A” Norm	“A” Limit
0.8 ton	1.63”	1.79”
1 ton	1.95”	2.15”
1.6 ton	2.05”	2.26”
3.2 ton	2.44”	2.68”
6.3 ton	3.32”	3.65”
9 ton	3.54”	3.89”

FIG13

BRAKE DISK WEAR LIMITS

• Annual inspection of the brake disk should be performed to ensure brake disk is within the allowable standards as shown in (FIG 14).

Capacity	D (in)	d (in)	tn (in)	tv (in)
0.8 ton	2.13”	1.57”	0.32”	0.28”
1 ton	2.13”	1.57”	0.32”	0.28”

TIMING MARKS FOR GEAR REPLACEMENT

• If the gears on the Premium PLH Lever Hoist need replacement or removal for any reason, make sure they are re-installed correctly. (FIG 15) shows the proper orientation of the timing marks when meshing the gears.

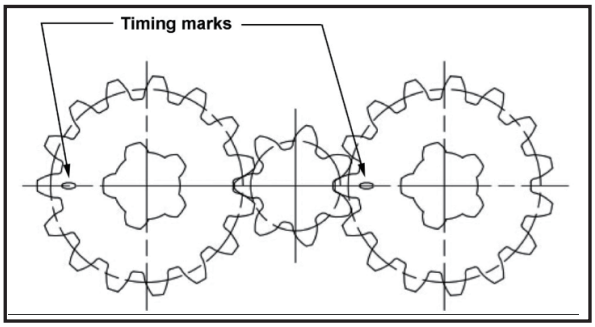

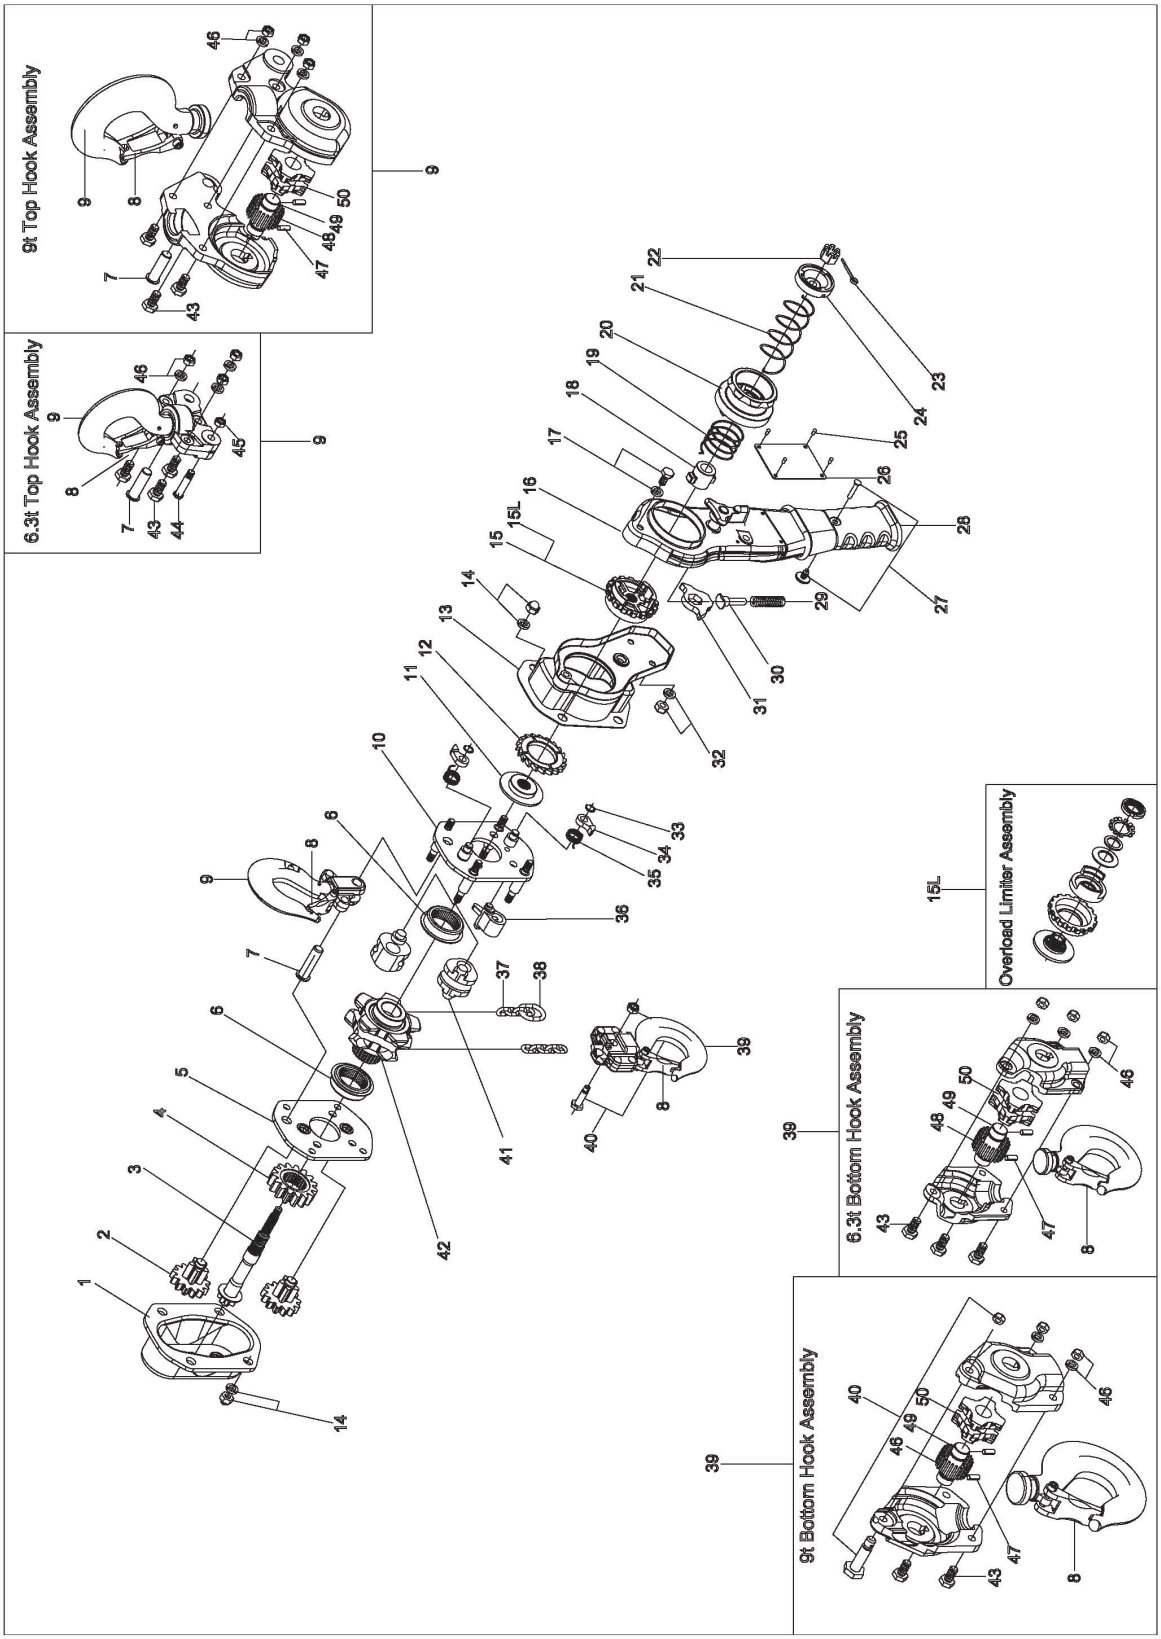

FIG15

REPLACEMENT PARTS

Replacement parts are listed on the following pages. To order parts or reach our service department, call 1-281-999-6900 Monday through Friday, 8:00 a.m. to 5:00 p.m. CST. Having the Model Number and Serial Number of your machine available when you call will allow us to serve you quickly and accurately. Non-proprietary parts, such as fasteners, can be found at local hardware stores. McMaster- Carr reference numbers are provided for hardware specifications. Some parts are shown for reference only and may not be available individually.
